

Echo

Care Relax \

The ideal chair for reading, watching TV or just relaxing. Budget friendly entry model that can be operated independently. Geriatric recliner, offering excellent seating comfort (ideal for use in elderly care settings). The sitting height and the armrests make sitting down and standing up from a seated position easier.

What makes the Echo Care Relax so unique? \

- \ \ User-friendly
- \ \ Different side panels
- \ \ Excellent balance between price, comfort and quality

SEAT, BACK AND LEG REST

Seat, back and leg rest (except for the SR – which has no leg rest) are upholstered. Excellent seating comfort. The back consists of a plywood frame with elastic webbing and polyether foam. The seat is made of plywood with Nosag springs and HR foam. The leg rest upholstery runs up to the seat.

USE OF ECHO ELECTRIC

The Echo electric is equipped as standard with a cable power supply. The Echo can be easily placed in the desired sitting or relaxing positions. The back and leg rest are synchronously electrically adjustable via a simple hand control.

To have more freedom of movement within the room, you can opt to work with a permanently integrated, non-removable battery with battery charger. This makes it easy to use the electric adjustment mechanism anywhere without being connected to mains power.

CE APPROVAL

The electrical version of the Echo relax is CE-marked according to the machinery directive. This involves analysing all possible risks when using the product. These risks were then addressed during the development of the product. Moreover, all electrical components also have a CE declaration and are therefore safe to use. CE declaration approved by renowned inspection agency Vincotte.
