

Share

Table \

The Share table integrates perfectly into any room and adapts to your needs. The solid oak table top gives this table a robust, timeless look. For a cosy dinner, a hearty breakfast or a spontaneous chat with a cup of coffee.

Warm and flexible

The Share design table stands for warmth and cosiness thanks to its solid oak table top. Share is extremely flexible in design. By choosing the leg, size and the colour you can give the table your own look that fits your taste and needs.

Thoughtful design

With its round, square or cross-leg, Share provides the necessary stability at the table and follows the line of your chosen table top. Share is designed with integrated floor caps under the floor plate, so that it does not touch the ground completely. This creates air circulation under the plate and prevents dirt accumulation and rust from getting a chance.

Big or small, young or old, with Share you share all the beautiful moments.

What makes the table Share so unique? \

- \\ Solid oak table top
- \\ Different table top sizes
- \\ Extremely sturdy
- \\ Wheelchair-accessible

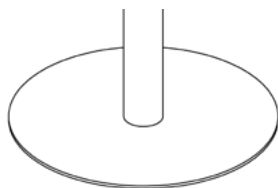

TABLE LEG

Round steel column, black epoxy coated.

Dimensions according to tabletop size: 76 mm diameter with 2 mm wall thickness for tabletops up to and including 90 cm diameter or 90x90 cm. Tabletops from 90 cm diameter or 90x90 cm have a table leg with 102 mm diameter and 2 mm wall thickness.

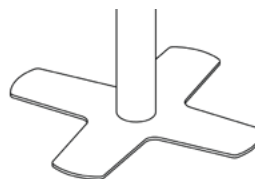

FLOOR PLATE

ROUND FLOOR PLATE

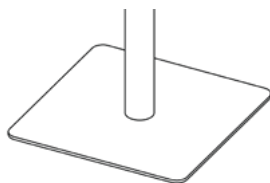

Black steel, epoxy coated, 8 mm thick. Fitted with teflon floor glides that allow the floor plate to slide easily over the floor. The glides are also very thin, making it easy to ride onto the floor plate with a wheelchair while leaving space to prevent direct contact between the floor plate and the floor. Dimensions according to tabletop: 52 mm diameter for tabletops up to and including 90 cm diameter or 90x90 cm. 70 mm diameter for tabletops larger than 90 cm diameter or 90x90 cm.

CROSS-SHAPED FLOOR PLATE

Black steel, epoxy coated, 8 mm thick. Fitted with teflon floor glides that allow the floor plate to slide easily over the floor. The glides are also very thin, making it easy to ride onto the floor plate with a wheelchair while leaving space to prevent direct contact between the floor plate and the floor. Dimensions according to tabletop: 57x57 mm for tabletops up to and including 90 cm diameter or 90x90 cm. 70x70 mm for tabletops larger than 90 cm diameter or 90x90 cm.

SQUARE FLOOR PLATE

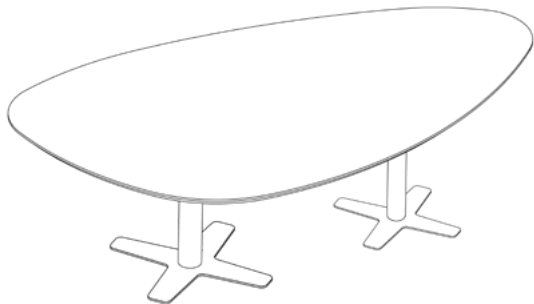

Black steel, epoxy coated, 8 mm thick. Square with rounded corners, radius 30 mm. Fitted with teflon floor glides that allow the floor plate to slide easily over the floor. The glides are also very thin, making it easy to ride onto the floor plate with a wheelchair while leaving space to prevent direct contact between the floor plate and the floor. Dimensions according to tabletop: 52x52 mm for tabletops up to and including 90 cm diameter or 90x90 cm. 70x70 mm for tabletops larger than 90 cm diameter or 90x90 cm.

TABLETOP

PEBBLE-SHAPED TABLETOP

Tabletop type Solid oak
Tabletop thickness 40 mm

TABLE CONSTRUCTION

The central post is screwed to the tabletop through a metal top plate. The top plate is made of black epoxy coated steel, 45 mm diameter and 6 mm thick.

The top plate is bolted to the column leg and screwed to the bottom of the tabletop. Resting on the floor on a metal floor plate with felt glides (round, square or cross-shaped), also bolted to the column.
